

# CIRCUS AND PERFORMANCE ART

### **Are you fascinated by contemporary circus?**

We educate young people with talent and motivation for the profession of circus artist. With our team of international teachers we offer a four-year study programme in a unique environment.

### **What can you expect from us?**

We work with students with an excellent technical level. You are encouraged to develop your personal artistic profile, both as creator, and artist in circus art. Our education enables you to start a professional career in various fields of contemporary circus and in other performing arts. You will become an artistic entrepreneur and receive the opportunity to build up your professional network.

Marleen van der Post,  
Circus and Performance Art, alumnus

**“ You can grow and learn  
and become the best  
version of yourself that  
you can be”**

## Why study at Circus and Performance Art?

- We encourage your individual development.
- You participate in the development and enrichment of contemporary circus as an important element of culture and (global) society.
- We encourage innovation and connection with societal challenges and technological developments.
- We offer individually shaped trajectories which stimulate the development of your unique artistic identity.
- You experience a multidisciplinary learning environment that encourages experimentation and artistic research.
- You will work with international qualified (guest-)teachers from the work field.
- You can use exceptional training facilities.
